# WORKSHOP 1.4

## Workspaces and artifacts
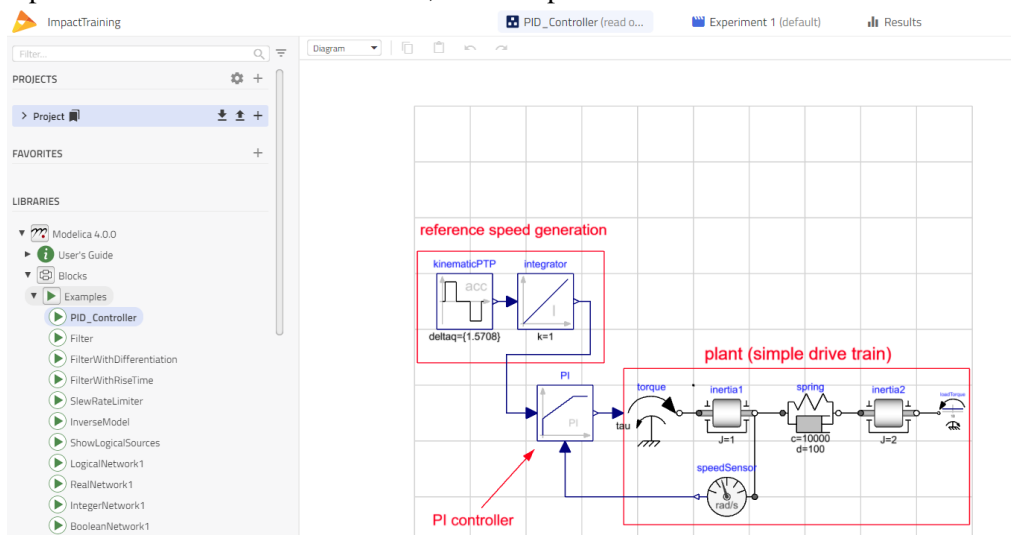

## Contents

## Introduction

In this workshop, you will download the result file from a simulation.

## Run a simulation

If you already have a simulation result, you can skip the first part here.

1. Open a model that can be simulated, for example:

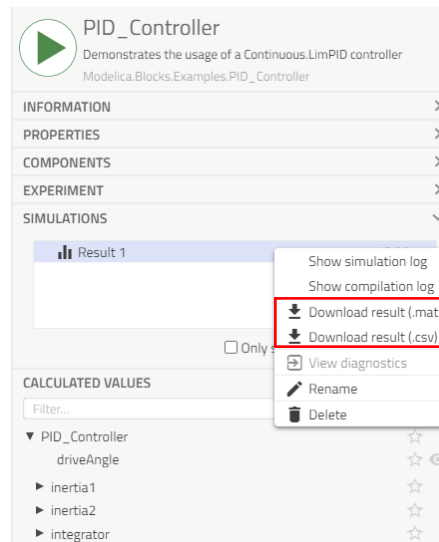

2. Press the simulation button to simulate the model and retrieve the result.

## Download the result file

Each simulation result is stored separately.

3. Go to **Simulations** tab under **Results** mode and find the result of interest, and press ⋯

4.  Choose *Download result*.

The result file is now available in our browser "Downloads" folder.

**This concludes workshop 1.4. Well done!**
